FOCUS AND SCOPE OF INDONESIAN AQUACULTURE JOURNAL

Indonesian Aquaculture Journal (IAJ) is a peer-reviewed and open access journal based in Indonesia that globally/internationally accepts and publishes scientific articles in the field of aquaculture. The journal is hosted and managed by the Center for Fisheries Research, Indonesian Ministry of Marine Affairs and Fisheries and serving as a scientific platform to share research information in and contribute to the development of various disciplines of aquaculture including genetics, reproduction, nutrition and feed, fish health and diseases, engineering, and environmental assessment.

Indonesian Aquaculture Journal (IAJ) (<http://ejournal-balitbang.kkp.go.id/index.php/iaj>) is published in both printed (p-ISSN 0215-0883) and electronic (e-ISSN 2502-6577) versions. Currently, IAJ is listed as Category 1 Accredited Journal in the Decree of the Ministry of Research and Technology/ BRIN of Republic of Indonesia (RISTEK/BRIN) No.: 85/M/KPT/2020, Date April 1, 2020. The accreditation is valid for five years from Volume 14 Number 2, 2019 to Volume 19 Number 1, 2024. IAJ has also been indexed in SCOPUS, starting from the Volume 14 Number 1, 2019.

This journal is published twice a year (June and December issues) with the first IAJ edition published in 2006. Submitted manuscripts will be rigorously checked by the IAJ Assistant Editor to comply with the IAJ writing format and content guidelines. Manuscripts, complied with the described process, will be reviewed by one member of the Editorial Board and one reviewer appointed by the IAJ Editor-in-Chief. The Editor-in-Chief has the authority to accept or reject submitted manuscripts based on the recommendations of the assigned Editorial Board member and reviewers.

INDEXING INFORMATION OF INDONESIAN AQUACULTURE JOURNAL

Indonesian Aquaculture Journal (<http://ejournal-balitbang.kkp.go.id/index.php/iaj>) has p-ISSN 0215-0883 and e-ISSN 2502-6577 is indexed, abstracted, or fulltext reproduced in the national and international indexing/library databases including SCOPUS, Science and Technology Index (SINTA), GARUDA, Google Scholar, Cross Ref, Mendeley, Indonesian Scientific Journal Database (ISJD), World Cat, Scilit, Sherpa/Romeo, One Search Lancaster University, BASE, British Library, and Dimensions.

PREFACE

Indonesian Aquaculture Journal (IAJ) has published high-quality research articles for 16 years and the current 2021 edition is IAJ Volume 16. The IAJ 2021 volumes are funded by the Center for Fisheries Research in the fiscal year of 2021. All published articles have gone through a complete cycle of the evaluation process by the Editorial Board, Reviewers, and Editorial Office.

Since 2016, the IAJ has made a significant improvement in managing and evaluating publication through the online Open Journal Systems (OJS). Some minor changes were introduced in IAJ including:

1. A written description of p-ISSN and e-ISSN at the bottom of the cover skin page, title page, and table of contents
2. Additional sheets for the list of reviewers, focus & scope of IAJ and Indexing Information
3. A gratitude sheet dedicated for reviewers involved in manuscript reviews of each issue
4. Each title sheet contains additional information regarding the website and email addresses as well as a short description about IAJ.

These changes are described in the preface texts of each issue.

The Volume 16 Number 1, 2021 presents six fisheries research articles: Variations of red color coverage of cultured neon tetra (*Paracheirodon innesi*) for breeding improvement strategies; Biochemical responses and genetic expressions of synthetic common carp population exposed to high-ammonia rearing environment; Induced spawning and larval development of vietnamese koi, *Anabas testudineus* (Bloch, 1792) using salmon gonadotropin releasing hormone analogue (S-GnRHA); Spawning of black ghost knifefish, *Apteronotus albifrons* with different sex ratios; Dietary organic mineral influences the growth, feed utilization, and vertebral mineral content of wild golden rabbitfish, *Siganus guttatus*; Stress responses of three species of cyprinid: common carp (*Cyprinus Carpio*), bonylip barb (*Osteochilus hasselti*), and torsoro (*Tor Soro*) subjected to oxygen depletion; Pollution index and economic value of vannamei shrimp (*Litopenaeus vannamei*) farming in Indonesia.

These scientific papers are expected to contribute to and fill the gap of the body of knowledge in the field of aquaculture. Most importantly, the information contained in the current publication can make a significant impact on the decision making of policy makers and managers to manage fisheries resources in Indonesia and worldwide. As the Editor-in-Chief, I would like to extend a sincere gratitude to the contributing researchers in this volume.

Editor-in-Chief
