PREFACE

Indonesian Aquaculture Journal (IAJ) in 2017 entered the Volume 12. The process of publishing this journal is funded by Center for Fisheries Research of the fiscal year 2017. All submissions should be published through the process of evaluation by the Editorial Board, Peer-Reviewers, and editing by Editorial Office.

Management of Indonesian Aquaculture Journal (IAJ) in 2017 began referring to the Open Journal Systems (OJS). In terms of appearance there was a little change, namely:

1. Inclusion of p-ISSN and e-ISSN in the upper right corner on the face skin page, title page and table of contents page of issue, without colons
2. Special Sheets for Peer-Reviewers
3. Sheet gratitude for Peer-Reviewers involved in the review of each number
4. Each title sheet no additional information on the website, email address and information about the IAJ.

This change information is displayed on each foreword for 2 (two) publications.

Second published in Volume 12 Number 1, 2017 presented six fisheries research articles. Those six articles are: Effect of stocking density on growth performance of domesticated barb (*Barbonymus balleroides*); Identification of SNP specific marker for crustacean hyperglycemic hormone gene: a somatic growth-related in giant freshwater prawn (*Macrobrachium rosenbergii*); Analysis of growth of lalawak *Barbonymus balleroides* (Valenciennes, 1842) in three culture methods; MHC-II marker potential linked to motile Aeromonad septicaemia disease resistance in African catfish (*Clarias gariepinus*); Performance of cultured white-leg shrimp in RICA probiotic application method in ponds aerated with supercharge blower; 'Yellow syndrome' in scleractinian corals throughout bintan district, Kepulauan Riau Province, Indonesia.

Those scientific papers are expected to contribute to policy makers and managers of fisheries resources in Indonesia. Editor would deliver sincere thanks to reseachers from the Center for Fisheries Research and outside for their active participation in this edition.
