FOCUS AND SCOPE OF INDONESIAN AQUACULTURE JOURNAL

Indonesian Aquaculture Journal (IAJ) is a peer-reviewed and open access journal based in Indonesia that globally/internationally accepts and publishes scientific articles in the field of aquaculture. The journal is hosted and managed by the Center for Fisheries Research, Indonesian Ministry of Marine Affairs and Fisheries and serving as a scientific platform to share research information in and contribute to the development of various disciplines of aquaculture including genetics, reproduction, nutrition and feed, fish health and diseases, engineering, and environmental assessment.

IAJ (<http://ejournal-balitbang.kkp.go.id/index.php/iaj>) is published in both printed (p-ISSN 0215-0883) and electronic (e-ISSN 2502-6577) versions. Currently, IAJ is listed as **Category 1 Accredited Journal** in the Decree of the Ministry of Research, Technology, and Higher Education of Republic of Indonesia (RISTEKDIKTI) and Accepted in SCOPUS Date Sept 23, 2019. The accreditation is valid for five years from Volume 11 Number 1, 2016 to Volume 15 Number 2, 2020). This journal is published twice a year (June and December issues) with the first IAJ edition published in 2006.

Submitted manuscripts will be rigorously checked by the IAJ Editorial Office to comply with the IAJ writing format and content guidelines. Manuscripts, complied with the described process, will be reviewed by one member of the Editorial Board and one reviewer appointed by the IAJ Editor-in-Chief. The Editor-in-Chief has the authority to accept or reject submitted manuscripts based on the recommendations of the assigned Editorial Board member and reviewers for the manuscripts

PREFACE

Indonesian Aquaculture Journal (IAJ) has published high-quality research articles for 14 years and the current 2019 edition is IAJ Volume 14. The IAJ 2019 volumes are funded by the Center for Fisheries Research in the fiscal year of 2019. All published articles have gone through a complete cycle of the evaluation process by the Editorial Board, Reviewers, and Editorial Office.

Since 2019, the IAJ has made a significant improvement in managing and evaluating publication through the online Open Journal Systems (OJS). Some minor changes were introduced in IAJ including:

1. A written description of p-ISSN and e-ISSN at the bottom of the cover skin page, title page, and table of contents
2. Additional sheets for the list of reviewers, focus & scope of IAJ and Indexing Information
3. A gratitude sheet dedicated for reviewers involved in manuscript reviews of each issue
4. Each title sheet contains additional information regarding the website and email addresses as well a short description about IAJ.

These changes are described in the preface texts of each issue.

The Volume 14 Number 2, 2019 presents six fisheries research articles: Gonad development of sandfish (*Holothuria scabra*) fed with vitamin E-supplemented diet; Organic enrichment of sediments: a case study at mariculture site, pegametan bay Bali, Indonesia; The potential of forest honey (*Apis* spp.) from Timor Island as antibacterial against pathogenic bacteria in fish culture; In vitro antibacterial efficacy of leaves extract of *Centela asiatica* against *Vibrio harveyi* and *Aeromonas hydrophila*; A case study of lymphocystis virus disease in farmed giant snakehead (*Channa striata*) in Mandiangin, South Kalimantan; Production performance and blood profile of climbing perch *Anabas testudineus* Bloch cultured in peat pond with different stocking densities

These scientific papers are expected to contribute to and fill the gap of the body of knowledge in the field of aquaculture. Most importantly, the information contained in the current publication can make a significant impact on the decision making of policy makers and managers to manage fisheries resources in Indonesia and worldwide. As the Editor-in-Chief, I would like to extend a sincere gratitude to the contributing researchers in this volume.
