PREFACE

Indonesian Fisheries Research Journal (Ind.Fish Res.J.) is the English edition of fisheries research journal to expand communication among scientists the entirely part of widely in the country. In 2006, this journal is published twice per year on June and December. For the publication 2006 is financially supported by the Agency for Marine and Fisheries Research, of the Ministry of Marine Affairs and Fisheries.

The Vol.12 No.1-June 2006 of this journal presents six main articles about: fishery resources in Aceh waters after tsunami; marine teleost; resources of deep-sea shark and ray in the Eastern Indian Ocean; population dynamics of the main pelagic species in the Java Sea; and biomass of spotted sardine in the Java Sea.

We do thanks to the Editorial Board for evaluating the articles before accepted for publication. Their contribution have undoubtedly increase the journal quality. Finally, we hope the Ind.Fish Res.J. would contribute importance information to support the fisheries and technology development in Indonesian.

CONTENTS

	Page
PREFACE	i
CONTENTS	iii
The Duration and Timing of Spawning Seasons in Marine Teleosts: A Biogeographical Approach <i>By: Fayakun Satria</i>	1-14
Spatial Distribution and Shoaling Behaviour of Fishery Resources in the Waters off Western Coast of Aceh: Preliminary Results from the Post Tsunami Expedition 2005 <i>By: Wijopriono, Mohamad Natsir, Aril Slotte, and Asep Priatna</i>	15-25
Stock Abundance Index, Density, Composition, and Distribution of Deep-Sea Shark and Ray Resources in the Eastern Indian Ocean <i>By: Suprpto and Badrudin</i>	27-36
Population Dynamics of the Main Pelagic Species Exploited in the Java Sea: Biological Parameters Estimates <i>By: Bambang Sadhotomo</i>	37-63
Population Dynamics of the Main Pelagic Species Exploited in the Java Sea: Stock Evaluation <i>By: Bambang Sadhotomo</i>	65-90
Prediction of Biomass of Spotted Sardine (<i>Amblygaster sirm</i>) in the Java Sea <i>By: Suherman Banon Atmaja and Bambang Sadhotomo</i>	91-99
